

VALMONT – – the art of care inspired by Swiss excellence

Valmont is an exclusive care brand that was created in the first plastic surgery clinic in Switzerland, founded in 1905 by Henri-August Widmer.

These are unique cosmetics that combine science, luxury and nature. Their foundation is Swiss precision and the exceptional effectiveness of active ingredients.

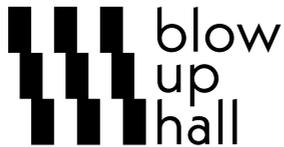

The brand draws inspiration from the very heart of Swiss nature, using water from the Arolla glacier and the power of plants from Alpine gardens, perfectly combining them with innovative anti-aging ingredients, such as: triple DNA with strong regenerating, antioxidant and cell renewal stimulating properties.

Professional and exclusive Valmont treatments are a unique combination of an exceptional skin care, massage rituals based on the characteristic "butterfly movement" and the iconic regenerating mask, consisting of 98% highly effective collagen and an immediate "WOW" effect.

Each product is a luxurious skincare ritual that not only beautifies the skin, but also offers sensual experiences – from silky textures to delicate, subtle scents. It is a philosophy of beauty that celebrates individuality, timeless elegance and harmony between body and soul.

The brand is loved by demanding customers all over the world, it remains synonymous with refined luxury and Swiss excellence.
